HardWire® Adds To Lineup With New TR-7 Tremolo/Rotary Extreme Performance Pedal

SALT LAKE CITY, Utah – HardWire®, a leading manufacturer of guitar pedals, has announced the new TR-7 Tremolo/Rotary Pedal at the 2010 Summer NAMM® Show in Nashville, Tennessee. The TR-7 is a true stereo tremolo, rotary, and vibrato pedal, which offers effects ranging from traditional tremolo to a highly-detailed rotary cabinet simulator. It also features true stereo I/O, allowing for complex connections and sounds with extreme flexibility.

The TR-7 features seven effects including; Tremolo, Opto-Tremolo, Bias Tremolo, Duo Tremolo, Rotary, Vibrato, and VibroPan. The TR-7 also includes HardWire's standard extreme performance features like true bypass and high-voltage rails.

"We improved on an already impressive lineup of HardWire pedals with the introduction of the technologically superior tremolo and rotary pedal. The highly advanced processing in the TR-7 is an exciting addition to a tour-worthy package of the HardWire pedals," stated Rob Urry, president, Harman Music Group.

Each HardWire pedal also features an assortment of tour-worthy accessories, including green gaffer tape common to pro pedalboards, Stomplock™ knob guards to maintain pedal settings and a hook & loop pad to fasten the pedal to a pedalboard.

The TR-7 will be available August 2010 with an MSRP of \$189.95.

DigiTech is a unit of Harman International Industries, Incorporated (www.harman.com). HARMAN (www.harman.com) designs, manufactures and markets a wide range of audio and infotainment solutions for the automotive, consumer and professional markets – supported by 15 leading brands including AKG®, Harman Kardon®, Infinity®, JBL®, Lexicon® and Mark Levinson®.
